COMPANY PROFILE

“

Our activity begins on Italian land.
After a couple of years, we opened branches
in Europe.
Then all over the world. Now, the acquisition
of important production and distribution
companies has further broadened our strategic
and commercial vision.
Our journey is made up of challenges, always
faced with true passion.
But from the very beginning, we have followed
only one direction: the path of quality.
Quality of technology, products, services, and
relationships with our customers.
This is the spirit of EK GROUP. And our products
embody the best of ourselves.

”

COMPANY //////////////////////////////////////

THE ROAD TO EXCELLENCE

Since 2001, EK Group has been leading innovation in the design, production, and distribution of special electric cables for the main industrial sectors: Automation, Food & Beverage, Port & Cranes, Mining & Tunneling, Oil & Gas, Metal Industry, Marine, Offshore, Railways. A key player in the global market, thanks to a strategic vision and a widespread presence on all continents.

EK Group has based its growth on uncompromising quality, the guiding thread of an entrepreneurial story that connects innovative drive, technological skills, and vocation for excellence.

EK Group offers companies real added value through innovative products and services, as well as a wealth of international knowledge and experience.

Choosing EK Group means having a solid and reliable partner by your side, flexible and technologically advanced, capable of designing customized solutions for every request and providing the best service for every need.

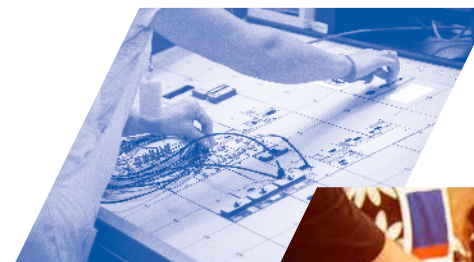

QUALITY AS A GUIDING PRINCIPLE

EK Group bases its philosophy on the pursuit of quality and on a culture of excellence that always puts the customer's needs first.

Quality is reflected in the search for innovative solutions, the provision of qualified technical consultancy, staff training, and customer relationships.

From the large-scale supply of customized cables and connection systems to the small-scale supply of standard products, EK Group offers flexible and tailored solutions to meet customer needs, establishing efficient working relationships and lasting partnerships based on trust.

////////////////// PHILOSOPHY

SERVICES

**HIGH-LEVEL
PERFORMANCE
TO GIVE REAL ADDED
VALUE TO
THE CUSTOMER**

THREE DIVISIONS TO CONTROL THE ENTIRE PRODUCTION CHAIN

Production of electric cables, production of connection systems, and distribution centers allow EK Group to offer a comprehensive service and ensure control over the entire process within the companies of the group.

EXPERT TECHNICAL AND COMMERCIAL STAFF

A specialized and constantly trained staff capable of providing reliable answers and competently managing projects of any level of complexity.

CUSTOMIZED CABLE AND HARNESSING DESIGN

The Research & Development division designs special cables, connectors, and innovative harnessing to offer customized and high-quality solutions, tested in laboratories and testing facilities.

GLOBAL PRESENCE FOR A LOCAL SERVICE

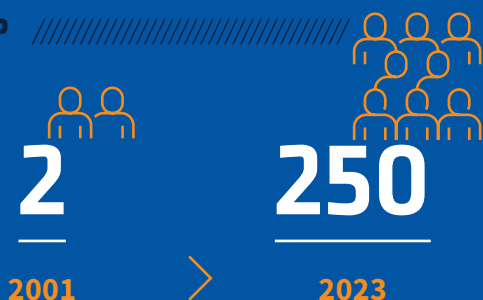

The various branches and a network of distribution centers spread across every continent allow us to operate anywhere with the prompt response and short lead times of a local player.

SERVICE TAILORED TO THE NEEDS OF EACH CUSTOMER

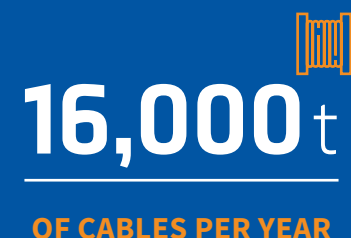

Thanks to the flexibility of our commercial structure, we are able to provide continuous support for large orders, and immediate availability on our e-commerce channel for standard orders.

DIVISIONS

THE THREE CURRENTS THAT POWER EK GROUP

PRODUCTION OF SPECIAL ELECTRIC CABLES

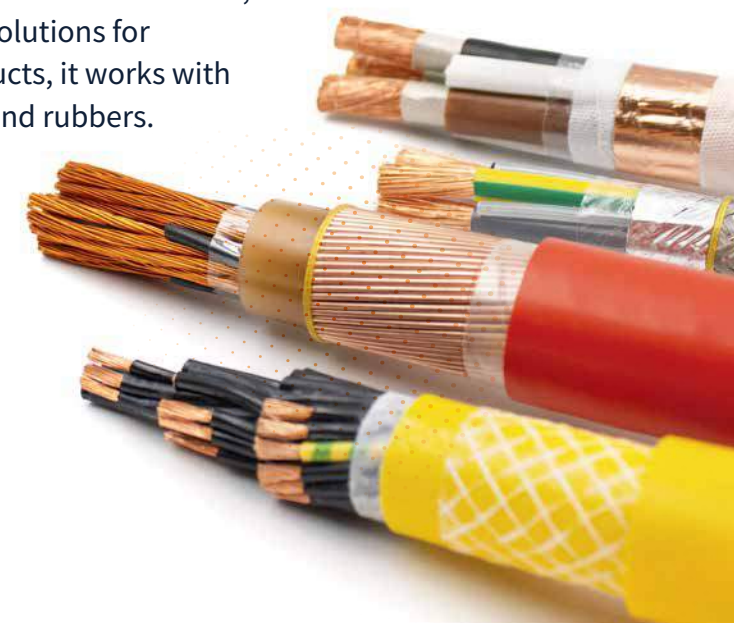

Constant investments in equipment and production technologies allow EK Group to work with multiple types of materials in its facilities.

SDB Special Cables, active for over 30 years with the production site in Brendola (VI), Italy, operates with flexibility and efficiency in the production of VFD, LV, instrumentation, and control cables.

The recent expansion of the plant allows SDB to produce different cable configurations for both fixed and mobile installations, working with various types of thermoplastic compounds.

CCI Control Cavi Industria, founded in 1981 with the production site in Ferentino (FR), Italy, it produces both LV and MV electric cables up to 45kV.

Specialized in the Marine, Offshore, and Oil & Gas sectors, with significant experience in special solutions for flexible and fire-resistant Firebar products, it works with thermoplastic compounds, silicones, and rubbers.

Global presence,
for a local service.

DISTRIBUTION

With its network of nationally profiled distribution centers, EK Group covers the worldwide market for the distribution of electric cables, connectors, and harnesses.

Elettrotek Kabel S.p.A. is the group's headquarters, based in Bagnolo in Piano (RE), Italy. In addition to being the main executive offices of EK Group, it is the primary logistics center: all shipments for the EMEA and Asian markets depart from here.

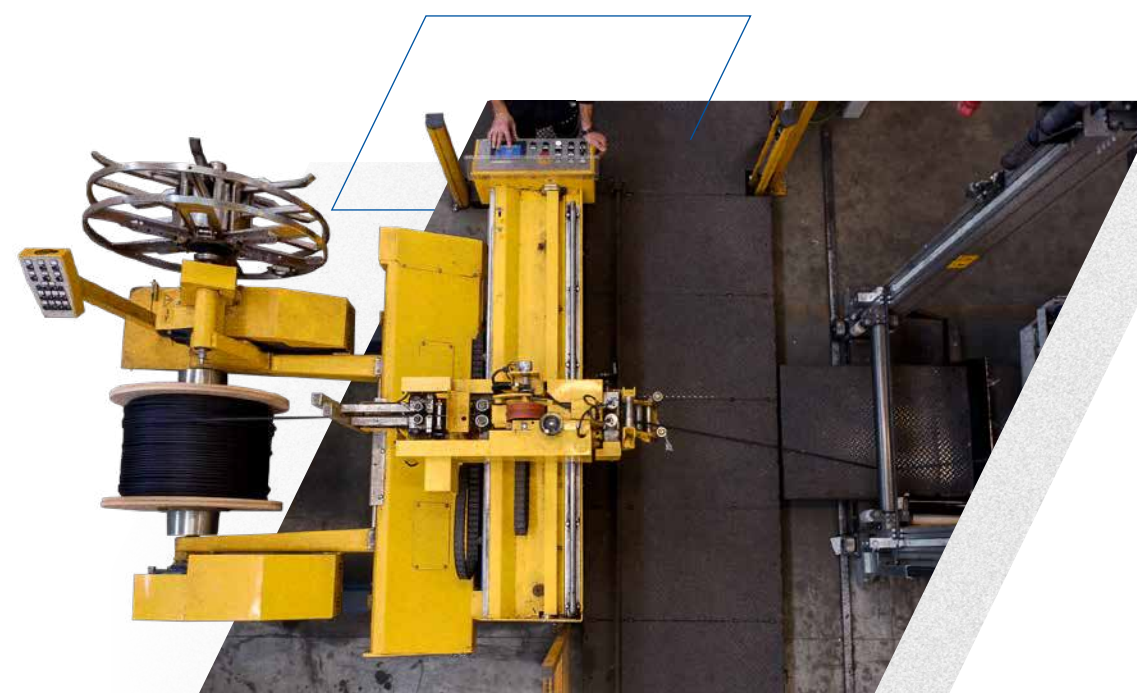

Elettrotek Kabel North America, based in Parsippany, NJ, USA, caters to the demands of customers in the USA and LATAM regions. Founded in 2011, it recently moved to a new location, further enhancing product availability for these strategic markets.

AWP Associated Wire Products has been part of EK Group since 2021, and serves as the logistics center in Ontario, Canada. Founded in 1987, it is the reference point for Canadian customers.

THE THREE CURRENTS THAT POWER EK GROUP

HARNESSING

Production of customized connectors and assembly of special cables according to customer needs.

MB Technology has been manufacturing connectors and harnesses for many sectors for over 30 years, combining the most modern production technologies, rigorous checks, and certifications.

Specialized in co-injection molding technology, both at low and high pressure, it can design and build customized solutions.

EK Group boasts a global presence, with four Italian offices, branches in the USA and Canada, and partner distributors worldwide. The widespread distribution translates into reduced delivery times, lower costs, and guaranteed rapid technical and commercial consultancy thanks to the local agents.

The path toward excellence is a process aimed at satisfying the needs of every customer, from small orders to large ones, ensuring high-quality standards and meticulous controls throughout the production chain.

All EK Group offices adhere to the highest national and international standards. Each product created is supplied to the customer with all the relative certifications and documentation required by the project.

EK Group carries out its business in compliance with environmental sustainability standards, pursuing environmental protection, and reduction of energy and resource consumption. With the ISO 14001 Environmental Management System Certification, we are committed to reducing the consumption of natural resources and energy and to preventing pollution.
